Front end developer job description template

Front-End Developer (w / m)

All about the job

Everything you see on viomodo was built and designed by our CEO. Sounds like a bad idea?

Especially because he's not a professional developer? That's because it is. So basically, you'll be replacing the viomodo CEO. Now that's a special job right there.

In your day-to-day work you will be the one to build and design viomodo's complete front-end application. Part of your role will be to introduce and promote best practices. Your experience will help us select the right tools for the jobs we do and constantly make viomodo more useful for patients, doctors and pharmaceutical companies that run clinical trials.

This is a full-time position that is based in our office right at the Spree river in east Berlin.

Tools we work with

- Application: Node.js (Express)
- Version control: Git
- Sequelize ORM
- View: Jade - Template Engine
- Quality: Mocha, Continuous Integration (CI)
- Cache: Redis
- Style: LESS
- Hosting: Amazon Web Services (AWS)
- Deployment: Ansible
- Build tool: gulp.js

Your qualification

- You have over 2 years of solid front-end experience. We want you to write beautiful, fast javascript and maintainable and modular CSS to a high standard, in a timely and scalable way that fits our needs.
- In order to succeed, you should be an expert in CSS3, HTML5 and modern javascript. Technologies such as AMD and CommonJS are not foreign to you and you think and work in a responsive, progressively-enhanced manner. Experience with Node.js is certainly a plus and prior work with automated or multi-platform testing is desirable, too.
- We're dealing with very sensitive information at viomodo. You should be able to protect it by using your knowledge of cookie management, crossdomain scripting and other browser security features.
- You're an explorer and conqueror, passionate about web user interfaces and pay attention to the little details. The JS environment evolves very fast. While you love to stay on top and have already tinkered around with ES6 and such, you can generally assess whether or not it makes sense to use a certain tool or technique for a given problem.
- You are driven by impact and the desire to learn. While you can embrace ambiguity of a startup environment you don't forget the fun, too. You enjoy a work environment with minimal hand-holding or supervision.

DANIEL GAN

Front End Developer | NEW YORK, 10005, USA | 800-555-0401

DETAILS

PROFILE

Innovative Front End Developer with 5 years experience building and maintaining responsive websites in the recruiting industry. Proficient in HTML, CSS, JavaScript, plus modern libraries and frameworks. Passionate about usability and possess working knowledge of Adobe Photoshop.

EMPLOYMENT HISTORY

Front End Developer at TEKsystems, New York

October 2016 – Present

TEKsystems is a leading IT staffing, IT talent management and IT services firm. As the Front End Developer, my core activities include:

- Creating new features, functionality and capabilities on the eCommerce sites using Java, Ajax, SASS, and JSON.
- Performing solutions for a streamlined, user-friendly interface with the design team.
- Designing and implementing HTML email templates and newsletters for marketing campaigns.
- Consulting with 508 Compliance professionals during development of new websites to ensure accessibility.
- Ensuring proper documentation and reports in all stages of product life cycles.

Front End Developer at Infinity Consulting Solutions, New York

July 2013 – October 2015

Infinity Consulting Solutions is a staffing and recruiting agency. As the Front End Developer, my core activities included:

- Building stable and maintainable codebases using React.
- Implementing a mobile-first approach to existing websites.
- Collaborating with designers to ensure designs were efficient and technically sound.
- Creating modular, responsive templates using modern CSS techniques and JavaScript libraries.
- Working directly with client stakeholders to develop technical solutions for business cases.
- Assisting with the transition from a waterfall method to the more efficient Agile methodology.
- Leveraging responsive web frameworks to complete deliverables ahead of schedule.
- Conducting A/B testing to identify bugs and UI improvements.

EDUCATION

New York University

2010

Degree: Bachelor's Degree in Computer Science

COURSES

Technical Lead/Web Developer

Job Description:

A Technical Lead/Web Developer is needed to help enhance and maintain Web site code, content, processes and infrastructure changes. This detail-oriented team player will be able to not only act as a technical lead for multiple web sites and integration projects involving external applications, but do hands-on coding and content updates using processes that fit our infrastructure as a whole. As the team grows, this technical lead will have the ability to define, implement, deploy and test web projects while managing the work of other web developers from project inception to full completion.

Responsibilities:

- Work with Project Management to gather requirements from business unit heads—provide technical analysis for scoping requested features and help manage implementation schedules using MS Project and OnTime
- Lead effort to migrate to an MVC paradigm for all existing Ektron CMS custom code
- Enhance css and code architecture to support mobile browsers with content in multiple languages using responsive css technology that integrates with Ektron methodology
- Lead the effort to determine Social Media content distribution and effectiveness monitoring tools that meet Marketing needs while enforcing compliance rules and limitation
- Develop/deploy templates/pages to support product launches along with any new features/data points that adhere to established Design Guides
- Maintain day to day operations of websites www.vaneck.com, www.marketvectorsetns.com, www.marketvectors-australia.com, corporate intranet, as well as additional custom applications such as developed for Sales and Marketing support
- Work with external vendors in developing and maintaining internationalization of the site, including Template, management, XLIFF file management, etc.
- Develop/Maintain Development/Staging/Production workflow for code, data and content
- New feature development (end user tools, expand data points, charting, etc.) as determined by Marketing on iIS 7, ASP.NET 4 and C#
- Configure website analytics reporting using Google Analytics, SEOmoz, GOMEX, Marketo and other tools to measure KPIs and eMarketing's activities effectiveness
- Integrate Web content and reporting with CRM platform using Ektron, Salesforce and Marketo
- Integration with in-house systems for User Registration info, Financial/Pricing data, etc. (Third Party external applications and SQL Server SSIS automation)
- Work with Systems to maintain and document hardware architecture (including Disaster Recovery, Failovers, etc.) using Visio
- Work with DBA in the configuration/consumption of Web Services. (SYBASE legacy integration and SQL Server SSIS automation)

Its solid theoretic and practical experience in you, business consulting and project management makes you extremely capable in projects of any size.
