Video editor app free download for android. Best free video editor app for android 2021. Free video editor app for android without watermark. Vsdc free video editor app for android. Video editor app free for android. Best video editor app for android free download.

Best video editing app for iPhone When it comes to iPhone, GoPro's excellent Splice app came out on top for us because of its fine array of thoughtful features, strong music offering and the backing of stacks of awards and a legion of loyal fans. Beyond that are several quirky little additions. You can do all the usual trimming of clips, add text, transitions and sound effects, and integrate tunes from your own music library. Amateurs and professional videographers now carry a powerful pocket film studio to film, edit and publish their cinematic creations. 8. With an intuitive interface and 'how-to' videos, you can get up and running in no time. Cons: Only on Android and Windows, 1080p and 4K require in-app purchase, watermark on videos. Plus, Selfie Scenes give you a selection of 360-degree backdrops to play with and Clips even recognises who's in your video and tees up sharing options for them - clever stuff! Pros: Easy to use, original features, backed by Apple. 3. 4. Pros: Wealth of professional features, excellent customer support. The app boasts everything you need to fine-tune your video, including tools to add captions, create transitions, and customise colours. You can speed it up, slow it right down, create stop-motion animations and even play it in reverse. Available for: Android and Windows phones and tablets. Cons: In-app purchases are required to access all features. The app allows users to create and edit simple videos using templates and stock footage and images from the Vimeo library. Available for: iPhone, iPad and Android. You can sync your video to the beat of your chosen soundtrack and add all the usual finishing touches, like titles and transitions. Or you can input songs from your own library and choose where to start the song from. The best video editing apps 1. And if you're not yet a "pro" you can still benefit from their tutorials and free support. Cons: Subscription required for full access to features. Price: Free, with in-app purchases (Upgrade plans start from \$4.99 per month). Pros: Easy interface, multi-device cloud storage. WeVideo (Image via App Store) Thanks to WeVideo's simplified interface, you don't have to be Quentin Tarantino to create up to 4K movies. 18. Pros: Easy-to-use user interface. Clips (Image via Apple) It's easy to overlook pre-loaded apps like Apple's own Clips but, with the weight of the tech giant's best brains behind it, this video editing app has plenty of powerful features to admire. Price: Free (Pro Edition \$4.99 monthly or \$39.99 annually). 14. Millions of users can't be wrong! This app makes it really easy for anyone to get started with video editing and it's a great stepping stone to perhaps a more professional editing app in the future. Available for: iPhone, iPad, and Android. Price: \$5.99. 10. Cons: Only available on Apple devices. Whether you're looking to recolour a poorly lit video or simply want to add a touch of black and white noir to proceedings, this is one of the few video editing apps available that handles these tasks with ease. 6. 7. Price: Free, with in-app purchases (subscription upgrades from \$3.99). KineMaster (Image via Google Play) KineMaster says their video editing app is made for professionals but is easy enough for everyone to use. 19. To enhance your movie making experience, VideoShow have combined more than 50 video themes, more than 30 bespoke filters and a library containing hundreds of free, licensed music tracks. Magisto (Image via Google Play) Designed with one-tap social sharing in mind, Magisto video maker uses Artificial Intelligence (AI) to pinpoint the best parts of your footage. Pinnacle Studio (Image via Pinnacle) Pinnacle Studio lets you edit video, audio and photos on the go. This free app lets you add transitions and effects onto a maximum of 200 photos and video clips from your photo library or GoPro Plus. Price: Free, with ads and in-app purchases. Take their live tiles setting as an example. Over and above the usual clipping, trimming and editing tools, this app boasts more than 20 themes, upwards of 40 visual effects and over 140 curated and royalty-free backing tracks in the Vitzunes library. Plus, you can play around with tons of fun filters and backgrounds. Cons: You need to upgrade to premium to access all of the tools and the full content library. The customisation doesn't end there either, because FilmoraGo also lets you add music from their licensed library and highly customisable titles. Pros: Great for animation, innovative features, easy to use. iMovie (Image via Apple) There's a reason why Apple's free apps pepper this list; they have a knack of creating brilliantly functional and easy-to-use apps that are loaded with original features. Cons: Not as intuitive as other editing apps, unsuitable for complex editing. 11. Pros: Simple and quick to learn, good range of themes. 16. Pros: Intuitive and easy to pick up, multi-device functionality, save videos in 4K or 1080p60. As it's Apple, you can switch between your devices with impunity, using AirDrop and iCloud Drive, to create your final cut. What's more, you can share your videos on VivaVideo's network of 'over 200 million users' to show off your wares. This is evidenced by frame-by-frame granular editing, pre-render instant previews and support for up to four audio tracks and unlimited audio clips. Plus, when you buy into one of their plans, you gain access to a vast library of licensed and royalty-free video clips, images and music tracks to add some extra gloss to your video. Premium and Professional subscriptions enable you to develop longer movies and access a wider array of editing styles. Cons: Users reported a high degree of in-app adverts and difficulties cancelling their subscriptions. Pros: Inbuilt slow-motion editor, active user base, plenty of fun features. Price: \$29.99, with in-app purchases. 13. Pros: Easy to use. Pitched at mobile journalists, filmmakers and professional video producers, LumaFusion comes fully loaded with features. That's just scratching the surface, we could go on and on! If you want a video editing app with extra clout then LumaFusion is worth considering. You can even let your imagination run wild with basic green screen special effects. It has a wide range of free music and sound effects to layer over your video and will even sync your video to the beat of your soundtrack. Pros: Packed with features, supports multiple layers of video and multi-track audio. Pros: Easy navigation and intuitive gestures, good range of features. KineMaster also enables up to two video layers, which can be animated using preset effects or keyframe animation, chroma key compositing, precise colour adjustment and speed control from 0.25x up to 1.5x without any audio pitch distortion. Pros: Easy to use, especially for beginners. FilmoraGo's main USP is its array of template themes, which are designed to transform run-of-the-mill videos into stylised movies. Quik (Image via App Store) The first of two video editing apps from GoPro, Quik analyses your videos to detect colours and faces in order to frame your footage perfectly. InShot (Image via App Store) InShot is a much loved video editing app with millions of positive reviews on both Google Play and the App Store. As a result, video editing apps have blown up. 12. You gain a host of video effects, FX editing with intuitive drag and drop controls, chroma key editable green and blue screen backgrounds, slow motion editing (even if you didn't film your video in slow motion originally), vertical videos specifically for mobile, and all the usual transitions and cropping tools. It's true that this app certainly veers towards the more serious side of editing. You can also add animated emojis and backgrounds to liven things up and music tracks intelligently sync to the length of your video. 5. VideoShow (Image via Google Play) VideoShow is a mobile video editing app for novices that features a broad spectrum of tools, including text overlays, visual effects, GIFs, stickers, multi-track music, photo filters, transitions, sound effects and live dubbing. LumaFusion (Image via App Store) LumaFusion is a serious video editing app for mobile and tablets with a serious price tag to match. But you don't need to be an editing genius to do it! The app has been designed with social media in mind so it's easy to resize videos for TikTok, Instagram, and so on. You can also rescale your shots within the video frame, which is a nice touch, and overlay Insta-inspired filters. A 'how-to' series of video editing hacks gives you tips on everything from creating GIFs to developing multi collage videos. Final thoughts With more video editing apps for Android, iPhone, iPads and desktop than you can shake a clipboard at, it's really a case of trial and error to find what interface and features work best for you. Not only can you trim, zoom and rotate photos and video clips, but you can also choose from 26 different themes and a range of fonts, filters and graphics. Price: Free, with in-app purchases. Pros: AI powered editing, 90 million users. With so many apps vying for your attention, we've curated the 21 best video editing apps for Android, iPhone and iPad in 2022, so you can fast forward to your favourite. Premier Rush has been built with sharing in mind, making it easy to resize your videos for different social networking sites and share instantly. Available for: iPhone and Android. Available for: iPhone, iPad and Desktop. Cons: Only available on iOS devices. Cons: Limited functionality, pro subscription needed for many filters. This lets you create animated captions and titles that appear automatically as you speak. You can capture professional videos directly from the app with the built-in camera, and easily edit footage with drag and drop functionality. Pros: MP4 audio compatibility, highly customisable, designed specifically for mobile. Cons: Minimal control and no trimming option, users reported that it can be glitchy at times. Cons: Requires iOS 12 or later, niche functionality. You also get dozens of video effects, a live-point colour correction editor, layer effects, live audio track mixer and sophisticated titler. Perfect if you're having "creative differences!" Pros: Easy to pick up, collabs are a nice touch. FilmoraGo (Image via Google Play) FilmoraGo offers the broad spectrum of editing tools we've become accustomed to on desktop, including reverse play, classic transitions, trimming and cropping, slow or fast motion editing, rotate, flip-over, voice-overs, audio mixing, picture-in-picture (PIP) and colour tuning. With Pinnacle Studio you can develop high-grade video from 720p up to 4K output and export your project to Pinnacle Studio for Windows to continue editing with the desktop version's advanced tools. 2. Pros: Vertical video editing, easy to use, good range of features. 15. Cons: Free version includes a watermark and has limited functionality. Hopefully this list has given you an idea of what app would be best for you! For more useful hints and tips about video creation and editing check out our article: 17 Top Tips for Creating Professional-Looking Videos Related Posts Cons: You'll need a Vimeo Pro account to access most features. Funimate (Image via App Store) Fancy yourself as the next Ariana or Bieber? One of Splice's strong points is its music offering. VivaVideo features slow/fast motion control, nine custom lens options, a library of background music and a range of collage templates. There's even an option to collaborate with friends, where you can superimpose your co-star to create the illusion that they're in the room with you. Adobe Premiere Rush (Image via App Store) As you'd expect from an Adobe product, Premiere Rush has plenty of neat features. Cons: Reports of audio syncing issues, on the pricier side for an app. Boasting the usual array of editing tools - including trimming, cropping, effects, titles, speed controls, animation, transitions and music - this well-established video editor has a cultish following of enthusiastic Splicers. Vizmato (Image via App Store) Vizmato unashamedly targets Instagrammers. Videoshop (Image via App Store) Videoshop is another hobbyist video editing app that packs in a surprising amount of functionality. Cons: Themes have to be purchased and only last a month. Last updated on 24th January 2022 Since the rise of smartphones, DIY video production has exploded. You can really take full control of your filters with interactive histograms of your colour channels, and the split screen review mode lets you compare your edited cut with the original. Price: Free, with in-app purchases (Weekly pro subscription starts at \$2.99). This mobile editing app offers video compression, easy sharing and square or no crop themes specifically for Instagram. Pros: Good suite of basic features, Adobe integration and support. Ideal for mobile video editors on the move. Magisto employs a wealth of video editing techniques - such as stabilisation, facial recognition, filters and effects, and auto cropping - for you to create eye catching videos. With a few taps of your phone screen, you can add all sorts of FX flourishes to your recording, like hearts and glitter, as well as stylised text and sound effects. You can create HD 1080p or 720p videos in cinema, square or portrait formatting for social sharing and even save your draft projects for up to seven days. Cloud storage lets you start your project on one device and pick up where you left off on another. 17. Simply arrange your clips on the storyboard, make precise edits in the timeline, and then add high-quality transitions, effects and a soundtrack. Pros: Packed with features, access to 100+ free songs, Flashbacks and QuikStories create videos based on your latest footage, syncs footage to the beat of your soundtrack, AI editing assistance. Splice (Image via App Store) With a stack of awards to its name, GoPro's mobile video editing app, Splice, claims to give you desktop editing performance on your iPhone or iPad. PicPlayPost (Image via App Store) PicPlayPost lets you add up to 365 pieces of media to create 30-minute movies that you can share in glorious 1080p quality. 21. Nice extras include split-screen effects, 10 high-fidelity filters, green-screen effects and the ability to make Hollywood-style trailers. The tools provided by this app are simple yet powerful, so you can do everything you need: trim, cut, add effects. Best video editing app for Android For Android, the winner has to be InShot. Of course, once your masterpiece is ready to air, it's super-easy to share your video on Vimeo as well as across your social media platforms. 9. WeVideo put full control in your hands over all the creative elements, like text, transmissions and motion effects. Developers Mixcord have a strong grasp of what mobile-savvy content producers want, offering personalisation options (alore - including custom watermarks and branded logos - and a 9:16 frame ratio for Instagram Stories. Pros: Easy to use, HD exports Cons: Watermarks in free version, adverts could be annoying. Available for: iPhone and iPad. Vimeo Create (Image via Vimeo) Video sharing giants Vimeo have weighed in with their own mobile video editing app in the shape of Vimeo Create. Cons: Transitions could be smoother, limited music and fonts. For instance, Videoshop lets you tinker with the playback of your video. Either add your own audio or choose a backing track from Magisto's library of commercially licensed tracks. VideoGrade (Image via App Store) If you love filtering and recolouring your photos on the move, and have always fancied doing the same with your videos, then VideoGrade will tick some serious boxes for you. Pros: Packed full of features, easy to use, one tap export, thriving Vizmato community. Best video editing app for iPad Our favourite video editing app for iPad is LumaFusion. Layer up the kitsch with custom text, stickers and a voice modulator if you're keen to sound like a chipmunk! This all-rounder also lets you film HD video with filters, themes and effects applied while you record. It's not free like some of the apps on this list but if you're serious about editing videos then this is the app for you. Cons: Adverts and in-app purchases could get annoying, users have reported glitches. Pros: Developed by GoPro, award-winning, highly regarded. VivaVideo (Image via App Store) VivaVideo is another one of those no frills, fun-packed video editing apps that lets you splice your video together with a few taps of your phone. Well, Funimate is marketed squarely at burgeoning bedroom popstars looking to create fun (the clue's in the name, guys!) videos to share across your social media channels. Cons: Watermarks on limited free version, users reported issues with chroma key compositing and exporting videos, requires subscription for full suite of features. Cons: Only for iOS devices (obviously!), struggles with a large number of clips. It allows you to edit three videos and three additional audio tracks with a range of high-spec trimming tools and transitions. When it's all ready, you can export your video in 720p or, if you're willing to buy an in-app upgrade, Full HD 1080p and 4K. PowerDirector (Image via Google Play) One of the few dedicated video editing apps for Android, PowerDirector offers powerful multiple track timeline video editing. This free app includes hundreds of special effects, stickers, filters, animated clips and subtitles to transform your video clips into shareable content. 20. Their ubiquitous iMovie app does everything a video editor should do. Cons: Some lagging when exporting videos. All you have to do is drop in your clips, trim them to size and add in built-in music, effects and animated titles. Available for: iPhone, iPad, Android and Windows. Price: \$2.99. Price: Free. Speed up, slow down and reverse videos and, for the especially time poor amongst us, the automated slideshow feature creates a makeshift movie for you.
